BOYUM SOLUTIONS

Beas Manufacturing

FEATURED PARTNER

OPTI-ONE

Specialized in the manufacturing of flexible packaging made from PolyEthylene (PE), laminates, woven and non-woven PolyPropylen for over 40 years, Bischof + Klein became one of the European leaders in the industry. The company acquired SAP Business One and the advanced production management solution Beas Manufacturing and succeeded in its digital transformation, essential to the development of its activities.

Customer Challenges

- Until 2017, the company didn't have any software to handle its production management
- The stock management was manual and most of the operations were done on paper
- The IT management was based on AS/400 systems (for sales management) as well as Microsoft Excel (for production management)

Solution

- Strong impact in all departments, but more in the production department, previously working mainly without IT tools

Results

- Huge impact on performance due to previously wasted time on visual checks of stock status or manual production management
- Order processing is now easier, faster and more efficient
- The real-time view of the stock allowed us to have reliable reports and to eliminate the physical weekly inventories

"THANKS TO BEAS MANUFACTURING, WE HAVE BEEN ABLE TO EVOLVE AND MODERNIZE OUR INTERNAL PROCESSES TO MAKE THEM MORE EFFICIENTS."

Nicolas Moreau, Methods & IT Engineer
